

Polar wheel . . . who lives where ?

(8 - 10 years old)

*Discover polar animals with the wheel . . .
from the North and*

South Poles !!!

Click on the links on the previous page to print . . .

in white : the Arctic wheel

in white : the Antarctic wheel

in blue : the Arctic cover

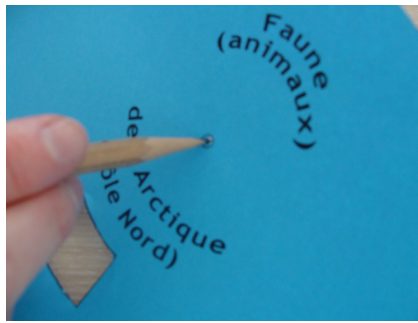

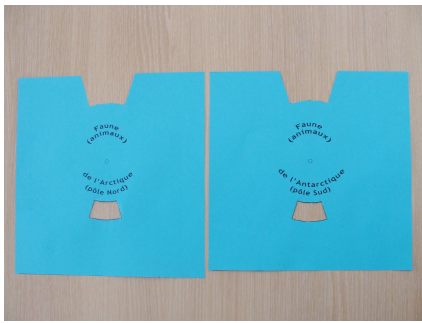

in blue : the Antarctic cover

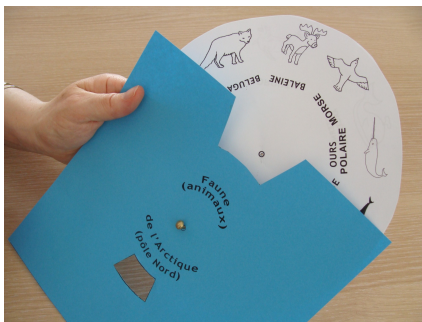

Cut the 2 wheels and glue them back to back .

!!! Pay attention !!!

*Check by holding up to the light that the 2 centers holes match . . .
After gluing, trim them if necessary !!!*

*Cut the 2 covers !
Don't forget the cut outs !
One cover has to be longer than the other !!!
using a sharp pencil make a hole in the center of the covers and wheel.*

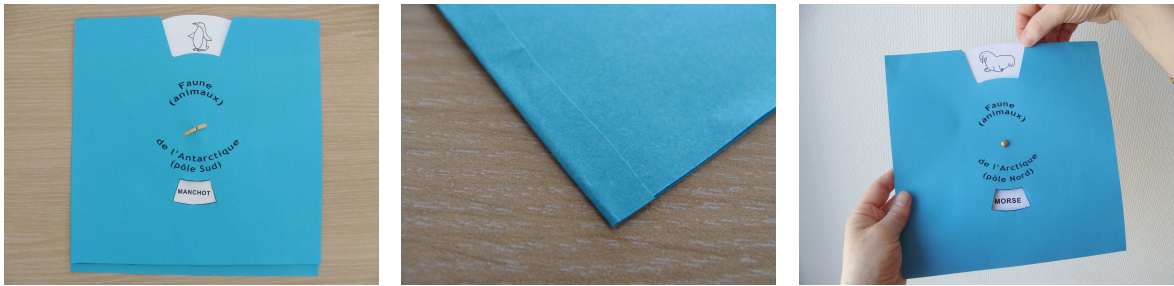

Put the wheel between the covers and slip a brad through the holes already drilled.

!!! PAY ATTENTION !!! The wheel must be in the right direction !!!

The bear must be absolutely be seen from the North Pole cover . . .

while the penguin appears on the side of the South Pole cover.

Turn the edge of the larger cover and glue it to the other cover as shown on the picture. Glue also the 2 upper corners of the cover. Then turn the wheel and discover "who lives where?" ...

Did you know ?

- *Belgica Fly has no wings. It has adapted because winds are too strong in Antarctica.*
- *Whales are faithful to their birth hemisphere. They rarely cross the equator.*
- *The Arctic Tern flies each year from one pole to the other and back. It is not very big, but each year it does a world tour !!!*
- *Beluga is a little white whale. It's also called "sea canary" because sounds it makes are harmonious.*
- *The tooth of the narwhal can be 3 meters long !!!*
- *A bear will never meet a penguin !!! They each live on a different pole !*
- *Santa Clause will never move to Antarctica. There are no reindeer there to pull his sledge !!!*
