

# Professor Sneeze

**explains climate change**

through educational tales free of charge on

**[www.contespedagogiques.be](http://www.contespedagogiques.be)**

***Goal** : to increase 5-12 years old children awareness of global warming and to search solutions with them*

+

*crafts, games, «to know more...» and pictures*

*Validated by Claude Lorius, glaciologist, CNRS Gold Medal, pioneer in Antarctic research, discoverer of the link between climate history and the composition of our atmosphere thanks to air bubbles in the ice. He is always ready to raise children's awareness of the climate problems.*
