

Beefy bears ! . . . (8 - 10 years old)

These polar bears are so beefy . . . they'll carry what you want !!!

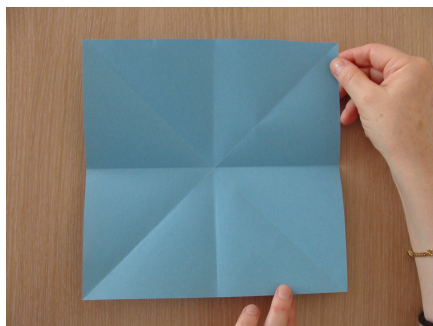

You need :

- white and colored sheet of paper
- glue, scissors and black marker

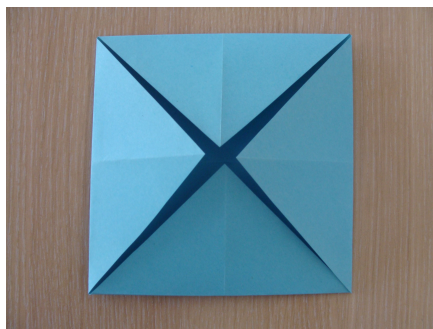

Out of a colored sheet of paper, cut a square of 21 cm.

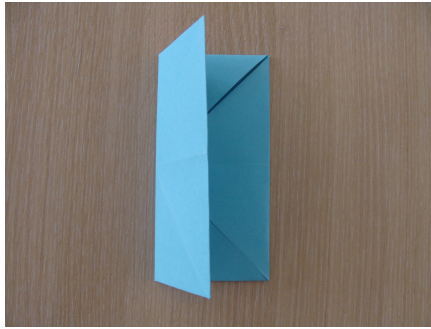

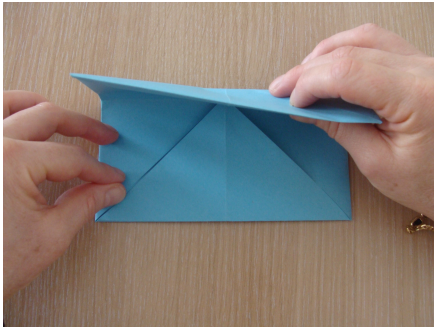

Fold the square in order to mark the diagonals and middle lines.

Look carefully at the pictures . . . and especially mark the folds !

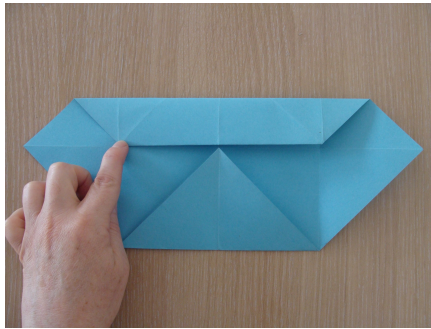

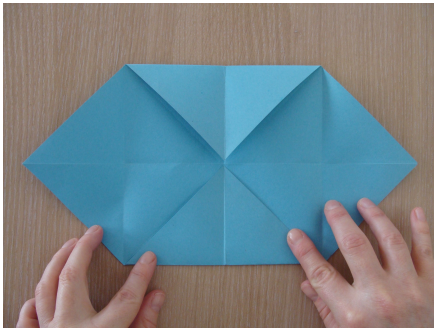

Take each corner of the square and fold them into the center.

Crease the folds.

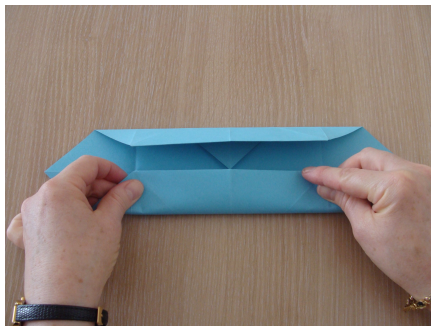

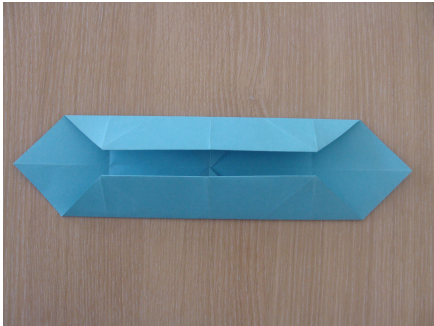

You have a smaller square. Fold it in half both ways to make lines.

Look carefully at the pictures . . .

Unfold 2 tips of the square as shown on the picture !

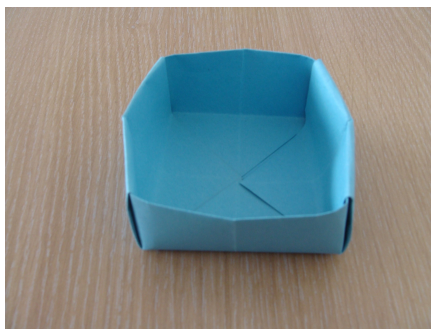

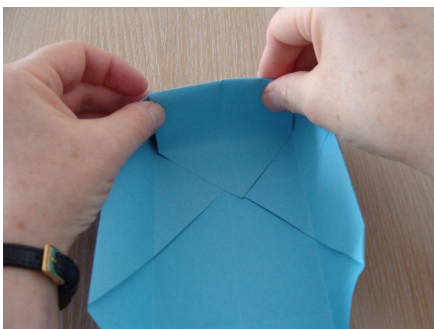

Then fold the upper edge to the center.

Mark the fold. Do the same with the other side.

Use the pictures to understand . . .

This step is difficult to explain: thus look carefully at the pictures . . .

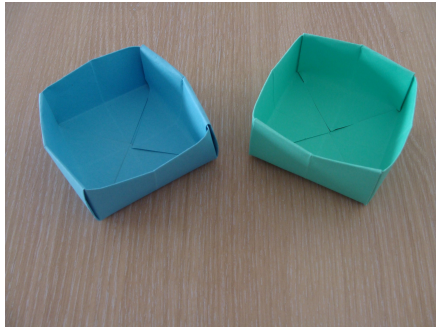

Open the fold you just made, you already have 2 edges. Then take one of the remaining tips and fold it to the center fold of the square. Fold the side edges toward the inside, in order to make the corners.

*You have the 3th edge.
Do the same for the last edge . . .*

!

Video clip on this link : <https://www.youtube.com/watch?v=tDpEu4GKkDc>

You have a nice basket !

To print the pattern of the bear click on the previous page . . . and cut it out !

Fold the bear at its forepaws.

Glue the entire body from the fold and on his front paws (arms).

Put the basket on the belly and press the paws onto the basket.

Use a black marker to draw 5 claws at the end of each paw . . .

Then fill the baskets !!!
